Skills

- **Programming:** Python, Java (Basics)
- **Frontend:** –
- **Backend:** –
- **Database:** –
- **Core:** Operating Systems

Projects

Power Generation Through Water *1st Semester*

Technologies: Basic Electrical Components, Water-Based Power Generation System

- Developed a water-based power generation project as part of the first-semester engineering project.
- Contributed to the design and implementation of the power generation system.
- Gained practical experience in teamwork, problem-solving, and project development.

Women Safety Device Using GPS and GSM Module *2nd Semester*

Technologies: Arduino UNO, GPS Module, GSM Module

- Developed a women safety device for emergency location tracking.
- Integrated **GPS** and **GSM** modules to share the user's location during emergencies.
- Contributed to the design, implementation, and testing of the safety device using **Arduino UNO**.

Experiences

- Fresher

Achievements

- **Introduction to Generative AI** – Completed course
- **Power BI for Beginners** – Completed course

Education

Bachelor of Engineering (B.E.) – Computer Science and Data Science

Adichunchanagiri Institute of Technology, Chikkamagaluru, Karnataka, India

2025–2029

CGPA: 8.3
